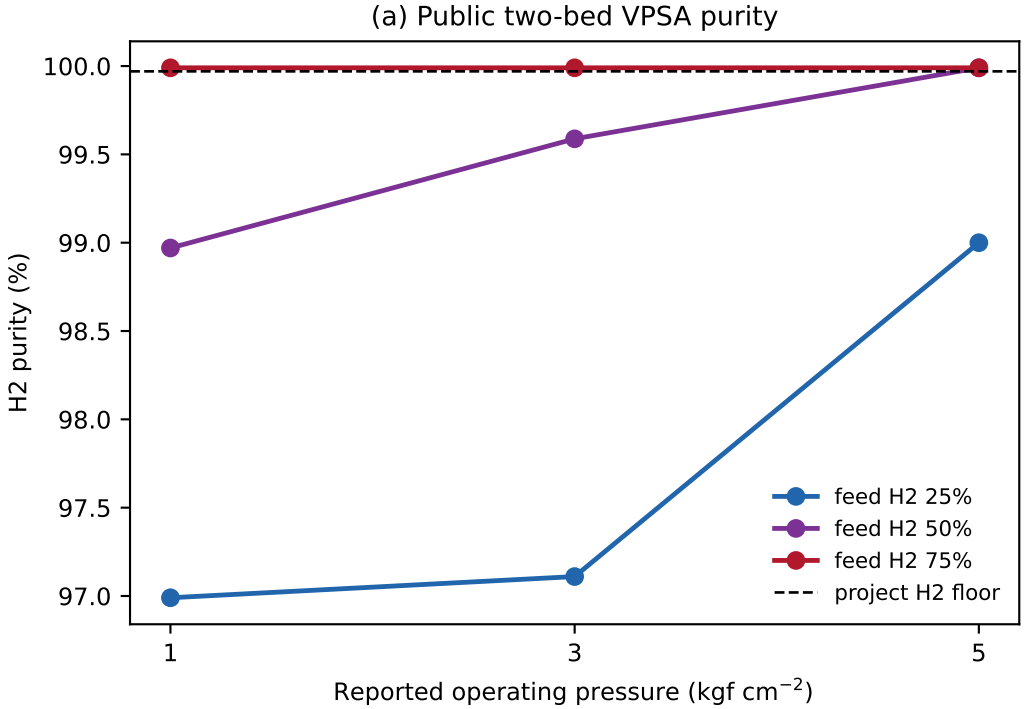
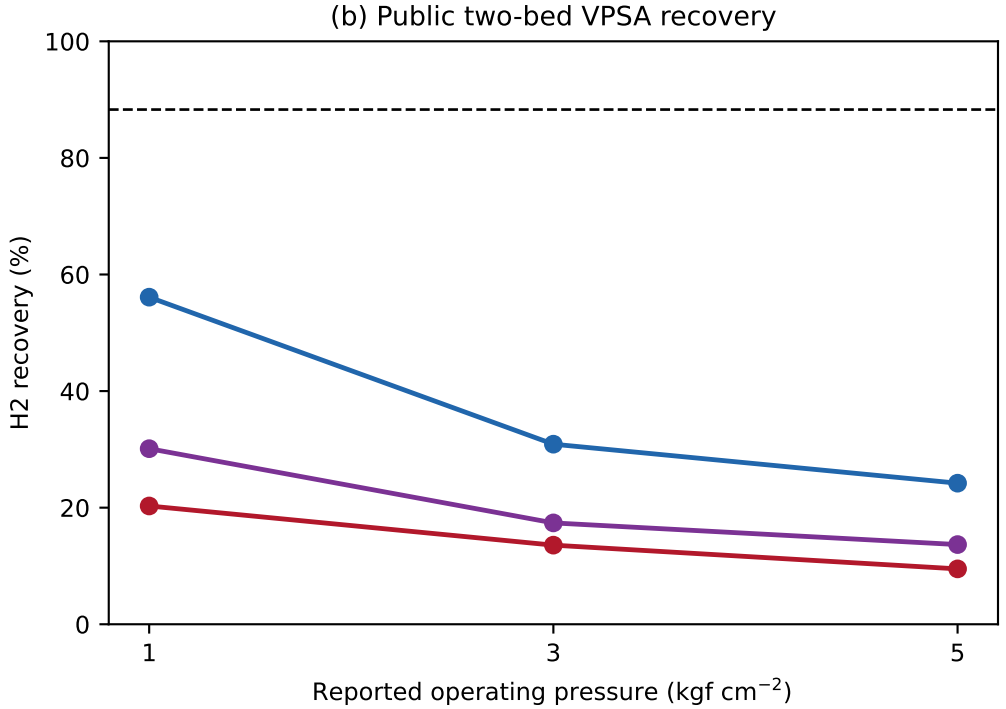
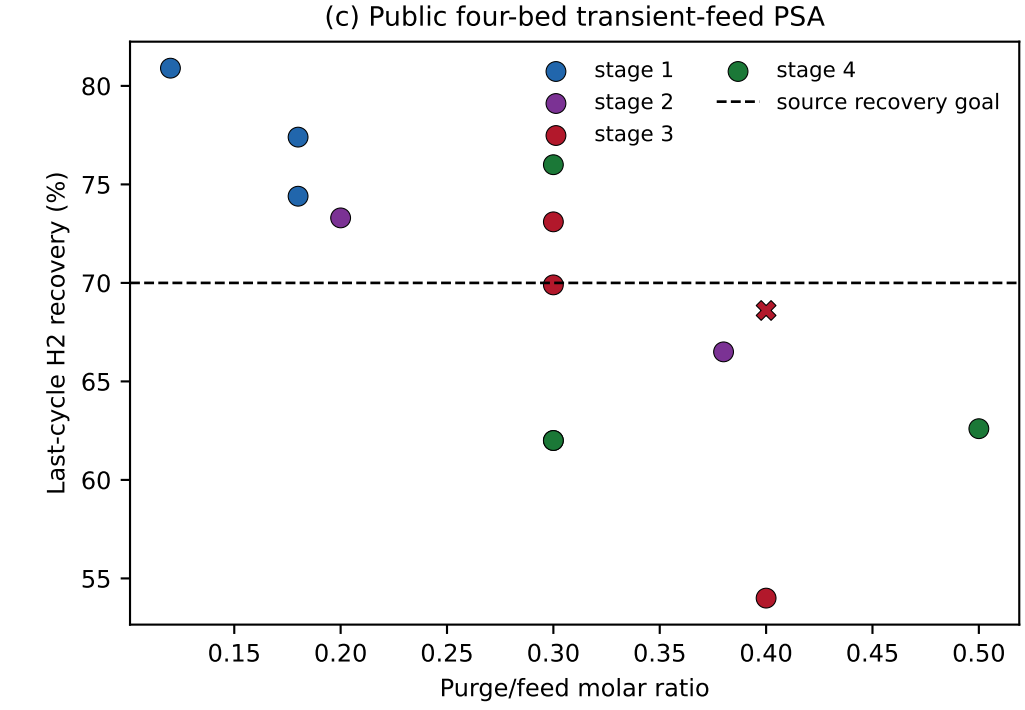
Two independent public H2 PSA experimental hold-outs







(d) Acceptance results

Post-freeze hold-out contract

Chen et al. directional endpoint tests: 12/12 pass
Purity-recovery rank association: rho = -0.766
Project joint purity-recovery gate: 0/13 pass

Voigt source gate (Type 1 and recovery >=70%): 6/13 pass
At least one pass in each of four feed stages: yes
Purge/feed-recovery rank association: rho = -0.758
Duplicate breakthrough-time differences: <3.3% (source)

No model coefficients or project thresholds were changed.
These are directional and event-structure controls,
not pointwise validation of the final integrated apparatus.
